1. Corporate information and reporting entity

Flow Capital Corp. ("Flow Capital", or "the Company") is a company under the jurisdiction of the laws of the Province of British Columbia, Canada, and is domiciled in Canada. Flow Capital resulted from a Plan of Arrangement made under Division 5 of Part 9 of the Business Corporations Act (British Columbia) as set out in the Arrangement Agreement between LOGiQ Asset Management Inc. ("LOGiQ") and Grenville Strategic Royalty Corp. ("Grenville") dated March 11, 2018. The Plan of Arrangement closed on June 7, 2018. On the same date, LOGiQ and Grenville amalgamated as one corporate entity and the corporate entity was named Flow Capital. As described in Note 6, the transaction was accounted for as a reverse acquisition under the acquisition method of accounting for business combinations with Grenville being the accounting acquirer. The transactions and balances of LOGiQ, the legal parent, and its other subsidiaries, are included in these consolidated financial statements from the effective date of the acquisition, being June 7, 2018, accordingly, the comparative figures include only the results of Grenville. The common shares of the Company are traded on the TSX Venture Exchange under the symbol FW. The registered and records office of the Company is Suite 2600, Three Bentall Centre, 595 Burrard Street, Vancouver, British Columbia, V7X 1L3.

The following is a summary of the list of material subsidiaries:

Legal name	Legal status	Ownership interest %
Flow Capital US Corp.	Subsidiary of Flow Capital	100
Grenville Corporation	Subsidiary of Flow Capital	100
Flow Investor Services Corp. (formerly LOGiQ Asset Management Ltd.)	Subsidiary of Flow Capital	100
LOGiQ Capital 2016	Subsidiary of Flow Capital	100
Tuscarora Capital Inc.	Subsidiary of Flow Capital	100

2. Basis of presentation

The financial statements have been prepared on a historical cost basis, except for cash and cash equivalents and investments at fair value that have been measured at fair value. The presentation currency for these financial statements is the Canadian dollar as the functional currency of the Company is Canadian dollar. The functional currency of the Company's subsidiary Flow Capital US Corp. is United States dollar and the financial statements of the subsidiary are translated from its functional currency to Canadian dollars. Amounts are stated in and recorded to the nearest Canadian dollar except where otherwise indicated.

Going concern considerations

These financial statements have been prepared using accounting principles applicable to a going concern. The going concern basis of presentation assumes that the Company will continue its operations for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of the business. On July 24, 2019, the Company announced that, subject to TSX Venture Exchange approval, it had raised capital of $10,000,000 through its Flow Priority Return Fund LP (see **Note 22**). As of June 30, 2019, the Company's liquid assets were $24,281,086 and this amount does not include the $10,000,000 cash from the capital raised through the Flow Priority Return Fund LP. The outstanding principal on the Series A convertible debentures ("Series A debentures") was $16,971,000 and the remaining term to maturity is six months. Based upon the available cash resources and other existing liquid assets, the Company has the capability to repay the principal on the Series A debentures.

Statement of compliance

These unaudited interim condensed consolidated financial statements have been prepared based on the principles of International Financial Reporting Standards (IFRS) and International Accounting Standard 34, "Interim Financial Reporting" as issued by the International Accounting Standards Board (IASB), London, and the Interpretations of the International Financial Reporting Interpretations Committee (IFRIC). The unaudited interim condensed consolidated financial statements should be read in conjunction with the Company's 2018 audited annual consolidated financial statements and accompanying notes.

The financial statements were approved and authorized by the Board of Directors on August 1, 2019.

3. Significant accounting judgements, estimates, and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates, and assumptions that affect the reported amounts of revenues, expenses, assets, and liabilities, and the disclosure of contingent liabilities, at the end of the reporting periods. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods.

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the financial statements. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively.

Business Combinations

One of the most significant areas of judgement and estimation relates to the determination of the fair value of the assets and liabilities acquired, including the fair value of contingent consideration, if applicable. Further, if any intangible assets are identified, depending on the type of intangible asset and the complexity of determining its fair value, the Company determines the fair value, using appropriate valuation techniques, which are generally based on a forecast of the total expected future net cash flows. These valuations are linked closely to the assumptions made by management regarding the future performance of the assets concerned and any changes in the earnings multiplier applied.

Royalty agreements acquired

The terms of the royalty agreements entered into by the Company provide that payments to be made by investee companies are fixed or determinable. In addition, each of the Company's royalty agreements contains one or more of the following terms: (i) a right in favour of the investee company to buydown or buyout part or all of the Company's royalty in exchange for a principal payment that, when combined with royalty payments made to the date of the buydown or buyout, exceed the value of the Company's initial investment; and (ii) the payment of a minimum monthly royalty payment by the investee company, which provides the Company with certainty of payment over time. As a result, the Company has concluded that it is highly probable (which it defines as a probability equal to or exceeding 75%) that it will collect greater than 85% of its initial investment under each royalty agreement.

For the royalty agreements acquired, the term of the agreement is normally perpetual, and the royalty amount received can be dependent on the revenues of the investee. The term of the royalty agreement can also be influenced by the termination of the royalty agreement subsequent to a contract buyout event. As a result, uncertainties exist as to how long the agreements will exist and the royalty payment income that will be received. The Company is primarily focused on building a portfolio of investee companies that have carried on business for a number of years and have a demonstrable history of revenues. This enables the Company to use historical revenues as the starting base for estimating expected cash flows from an investment. Those royalty agreements that contain a provision requiring an investee company to make a minimum monthly royalty payment provide the Company with a strong indication of what expected cash flows under the royalty agreement should be over time. In addition to historical revenues of investee companies, the Company also considers other factors, such as external market factors, future performance and industry performance, in estimating expected cash flows from an investment.

Royalty agreements acquired and promissory notes receivable and measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values for financial assets and liabilities. The Company has established a control framework with respect to the measurement of fair values. This includes that all significant fair value measurements have been reviewed and approved by the Investment Committee of the Company. The Investment Committee reviews on a quarterly basis, significant unobservable inputs and valuation adjustments used in the fair value measurement of royalty agreements acquired and promissory notes. Fair values are categorized into different levels of a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.
Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.
Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

Further information about the assumptions made in measuring fair values for financial instruments are included in Note 7.

Fair value of stock options and warrants

Determining the fair value of stock options and warrants requires judgement related to the choice of a pricing model, the estimation of stock price volatility, the expected forfeiture rate and the expected term of the underlying instruments. Any changes in the estimates or inputs utilized to determine fair value could result in a significant impact on the Company's future operating results or on other components of equity.

Income taxes

The recognition of deferred income tax assets and liabilities requires estimates and significant judgements about future events such as future taxable profits based on the information available at the reporting date. For each reporting period, the income tax and deferred tax provision reflects our best estimate based on the information available at the reporting date. To the extent that our estimate of tax provisions or the realization of deferred tax assets or liabilities are not as expected, the provision for income taxes may increase or decrease in the future to reflect the actual experience.

4. Changes in significant accounting policies and standards issued but not yet effective

a) Changes in significant accounting policies

The Company has initially applied *IFRS 16 Leases* ("IFRS 16") from January 1, 2019 ("Initial Application") which replaces IAS 17 *Leases* and related interpretations. IFRS 16 establishes a single, on-balance sheet accounting model for leases. As a result, the Company, as a lessee, has recognized a right-of-use asset representing its rights to use the underlying assets and a lease liability representing its obligation to make lease payments. The right-of-use asset, where it relates to an operating lease, has been presented net of accumulated amortization and is disclosed under property and equipment, and for the finance leases, the right-of-use asset is shown as finance lease asset. The lease liability has been disclosed as a separate line item, allocated between current and non-current liabilities. The Company has adopted IFRS 16 using the modified retrospective approach with the effect of initially applying this standard at the date of Initial Application. Accordingly, this election means that the comparative information has not been restated and the disclosure requirements in IFRS 16 have not generally been applied to comparative information. Following a review of the Company's leases, a $29,505 adjustment is required to the accumulated deficit as at the date of Initial Application.

b) Standards issued but not yet effective

At the date of authorization of these financial statements, certain new standards, amendments, and interpretations to existing IFRS standards have been published but are not yet effective and have not been adopted early by the Company.

Management anticipates that all the pronouncements will be adopted in the Company's accounting policy for the first period beginning after the effective date of the pronouncement. The new standards and interpretations that have been issued are not expected to have a material impact on the Company's financial statements.

5. Disposal group held for sale

On April 15, 2019, Flow announced they had entered into an asset purchase agreement (the "Asset Purchase Agreement"), providing for the sale of the Global Partner assets owned by LOGiQ Asset Management Ltd. ("LAML") (the "Transaction"). The assets are comprised of the Global Partner sales-related fee earning contracts and certain other business-related assets. Under the terms of the Asset Purchase Agreement, the purchase price for the assets sold was $12,375,000. The purchase price is subject to an adjustment of up to $1,500,000 upward or downward if the revenue of the Global Partners business for the 2019 fiscal year increases or decreases by more than 5% compared to the revenue for the 2018 fiscal year (the "Purchase Price Adjustment").

Under the terms of the Transaction, Flow received a cash payment of $1,375,000, a first note in the principal amount of $9,500,000 bearing interest at an annual rate of 10%, which may be called by Flow any time after August 1, 2019, to be repaid no later than four month's of the demand date, and a second note in the principal amount of $1,500,000 bearing interest at an annual rate of 10%, repayable on the later of: i) the date that is two months following the date on which the first note is repaid and ii) three business days following the determination of the Purchase Price Adjustment.

As part of the Transaction, Flow disposed of assets that had a carrying value of $11,897,816. For the three months ended March 31, 2019, these assets were classified as assets held for sale and were measured at the lower of the carrying amount and fair value less costs to sell. The carrying amount at March 31, 2019 and the date of disposal was made up as follows:

Prepaid expenses	$	57,716
Property and equipment, net of accumulated amortization		1,716
Notes receivable		130,000
Intangible asset, net of accumulated amortization (**Note 11**)		11,708,384
Total assets held for sale	**$**	**11,897,816**

As a result of this disposal, the Global Partner business is classified as a discontinued operation in accordance with IFRS 5. Net earnings from discontinued operations is comprised of the following:

6. Business acquisition

Reverse acquisition of LOGiQ Asset Management Inc.

On March 12, 2018, Grenville and LOGiQ announced that they had entered into an arrangement agreement (the "Arrangement Agreement") pursuant to which LOGiQ had agreed to acquire all of the issued and outstanding common shares of Grenville on the basis of 6.25 common shares of LOGiQ for each outstanding Grenville Share (the "Transaction"). The purpose of the Transaction was to provide scale to the existing business to allow both businesses to grow and enhance shareholder value. The Transaction was completed on June 7, 2018, with the pre-transaction owners of LOGiQ holding approximately 33% and the pre-transaction owners of Grenville owning approximately 67% of the combined company. Simultaneously, Grenville and LOGiQ amalgamated to form one corporate entity named Flow Capital Corp. which will continue as one corporation. The board of directors of Flow Capital was comprised of 6 people, of which 4 were designated by Grenville and the remaining 2 by LOGIQ, with the majority of the management of Flow Capital coming from Grenville. Based on the composition of the board of directors, the composition of key management personnel and the proportionate ownership of each control block, Grenville was deemed to have obtained control and was considered to be the acquirer of LOGiQ for accounting purposes. The transaction is accounted for as a reverse acquisition under the acquisition method of accounting for business combinations in accordance with the principles *of IFRS 3 Business Combinations.* Accordingly, the results of the acquisition have been recognized from the date of closing.

The details of the consideration and the fair value allocation to the acquired identifiable assets and liabilities assumed are as follows:

Consideration		
327,378,042 common shares outstanding at $0.015 per share	$	4,910,671

In Canadian dollars, for the six months ended June 30, 2019

Bargain purchase gain		(5,459,147)
Total consideration	**$**	**4,910,671**

Consideration

The consideration was based upon the closing number of shares outstanding in LOGiQ as at June 6, 2018. The $0.015 share price used to calculate the consideration was the closing price of LOGiQ's shares on June 6, 2018. As part of the transaction, there were some stock options replaced by the acquirer, but due to the small amount involved it was not considered material to include as part of the consideration.

Intangible asset – Global Partner sales related fee earning contracts

The valuation of the intangible asset was valued at a multiple of 7.59 times the gross annual revenue less direct costs in respect of the acquired contracts. The valuation also considered inputs from third parties who were looking to purchase the contracts when LOGiQ were actively planning to sell the contracts. Employees that are key to the success and growth of the acquired asset will continue to work for the Company. The useful life of the acquired contracts was determined to be eight years, with the contracts to be amortized on a straight-line basis over the expected useful life.

Convertible debentures

The 7.00% senior unsecured convertible debentures mature on June 30, 2021. The face value of the outstanding debentures was $5,213,590 and the fair value was based on a price of $0.7207, which was the last traded price prior to the closing of the Transaction. An accretion amount of $1,614,436 was recognized and this amount will be amortized over the period from June 7, 2018 to June 30, 2021.

Bargain purchase gain

The bargain purchase gain of $5,459,147 arose due to the fall in the share price of LOGiQ since the Arrangement Agreement was negotiated and the share price of $0.015 at the closing date. This gain was calculated based on the information available as at August 23, 2018 and since that date, the Company was in the process of finalizing the fair values of all assets acquired and liabilities assumed. During this quarter, this process was finalized and an additional bargain purchase gain of $304,908 was recognized during the three-months ended June 30, 2019. This adjustment did not have a material impact on the acquired assets and assumed liabilities previously recognized.

Transaction costs and contribution

During the year ended December 31, 2018, transaction costs of $365,859 were incurred in connection with the Transaction and have been expensed in the consolidated statements of net and comprehensive income. Excluding the transaction costs expensed in the period, for the year ended December 31, 2018, the acquisition has contributed $1,889,302 to revenues and an operating loss of $182,907 to the net and comprehensive income. For the three and six months ended June 30, 2019, the Global Partners business has contributed $140,081 and $886,032, respectively, to revenues and an operating loss of $(120,571) and $(186,421), respectively. (Note 5).

7. Fair values

a) Valuation Technique

The Company uses valuation techniques with the objective of determining a fair value measurement that reflects the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of the royalty agreements acquired and promissory notes receivable by the Company are determined using discounted cash flow models with fair value estimated by applying a discount rate based on a weighted average cost of capital using variables from the industry in which each investee company operates as well as company specific variables. Future cash flows are weighted by the Company using a combination of a probability approach and a terminal value approach, as applicable, and the fair value for each investment is individually calculated. Some or all the inputs used in the cash flow model may not be observable in the market and are generally derived from published sources that are commonly used by market participants.

The fair value of equity securities in investee companies that are classified as Level 1 in the fair value hierarchy are determined using the closing share price on the last business day of the reporting period provided that such securities have actively been traded.

As a result of the significant use of unobservable inputs, a high degree of management judgement and estimation is required. Management judgement is required for the determination of the expected future cash flows on the financial instrument being measured, determination of the probability of the outcomes, adjustments to the discount rate for liquidity risk, model uncertainties and investee-specific risk factors. The extent of the adjustments to the discount rate is based on management's assessment that a third-party market participant would take them into account in pricing the transaction.

b) Fair value hierarchy – financial assets measured at fair value

All financial assets are measured at fair value. All financial liabilities are measured at amortized cost.

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:
Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.
Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.
Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

The financial assets measured at fair value by hierarchy are shown in the table below. The amounts shown are based on the amounts recognized in the statements of financial position. All financial assets are classified as financial assets and measured at fair value through profit and loss.

	Total	Level 1	Level 2	Level 3
June 30, 2019				
Cash and cash equivalents	$ 8,556,856	$ 8,556,856	$ -	$ -

	$32,683,525	**$ 10,728,823**	**$ -**	**$ 21,954,702**

For the year ended December 31, 2018, there was $4,050 transferred from equity securities in investee companies under Level 3 into equity securities in investee companies under Level 1.

The following table shows a reconciliation between the opening balances to the closing balances for fair value measurements in Level 3 of the fair value hierarchy.

	Balance at January 1, 2019	Total gains and (losses) recognized in profit or loss	Purchases	Sales	Maturities and repayment	Transfers in/(out) of Level 3	Balance at June 30, 2019

Equity securities in investee companies	4,050	559,332	291,238	-	-	(4,050)	850,570
Loans	-	(1,447,318)	1,447,318	-	-	-	-

In Canadian dollars, for the six months ended June 30, 2019

Promissory notes receivable	2,506,822	(981,902)	-	-	(1,524,920)	-	-
Total	**$ 21,194,361**	**$ (2,759,966)**	**$6,921,980**	**$(1,778,115)**	**$(1,619,508)**	**$(4,050)**	**$ 21,954,702**

The valuation technique used to determine the fair value of the royalty agreements acquired is a discounted cash flow model. The most significant unobservable inputs used in the valuation are the discount rate (range is between 13.8%-27.2%), growth rate of the revenues of the investee (range is between no growth and 50%) and the liquidity premium (range is between 4.2%-13.5%). The low and high input values represent the actual highest and lowest level of values used over the portfolio and represent the range on an individual investment basis. The input ranges will therefore vary from period to period based on the characteristic of the underlying investment at each statement of financial position date.

c) Sensitivity of fair value measurement to changes in unobservable inputs

For fair value measurements of the royalty agreements acquired in Level 3, changing the most significant unobservable inputs by 1% would have the following impact on the fair value of these assets as at June 30, 2019 and December 31, 2018 as follows:

June 30, 2019			December 31, 2018		
Discount rate	Revenue growth rate	Liquidity premium	Discount rate	Revenue growth rate	Liquidity premium
$ 564,679	$ 116,681	$ 16,991	$ 591,858	$ 116,681	$ 17,774

d) Financial liabilities not measured at fair value

All financial liabilities are measured at amortized cost. The table below is a comparison of the carrying amount and the fair value of the financial liabilities that are recognized in the statements of financial position:

	Carrying Amount June 30, 2019	Fair Value June 30, 2019	Carrying Amount December 31, 2018	Fair Value December 31, 2018
Financial liabilities				
Accounts payable and accrued liabilities	$ 1,935,828	$ 1,935,435	$ 2,311,828	$ 2,311,361
Convertible debentures	20,690,124	20,913,705	20,410,159	19,886,553
Total	**$ 22,625,952**	**$ 22,849,533**	**$ 22,721,520**	**$ 22,197,914**

The following methods and assumptions were used to estimate the fair values:

- Accounts payable and accrued liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.
- The fair value of the debt component of the convertible debentures for June 30, 2019 and December 31, 2018 was based on the listed price of the security at that date less a calculated price for the convertible option using a Black Scholes model.

8. Financial risk management objectives and policies

The Company's primary risk management objective is to protect the Company's assets and cash flow. The Company is exposed to market risks including interest rate, credit, foreign exchange and liquidity risks. The Company's management team oversees the management of these risks. It is the Company's policy that no trading for speculative purposes shall be undertaken.

The Board of Directors reviews and agrees to policies for managing each of these risks, which are summarized below:

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise several types of risk: interest rate risk, currency risk, commodity price risk, and other price risk, such as equity risk. The Company is not directly subject to commodity price risk and has exposure to equity price risk on the equity securities held in investee companies.

Interest rate risk

The Company invests surplus cash in bank deposits which, due to their short-term nature, do not expose the Company to any material interest rate risks. For royalty agreements acquired and promissory notes receivable, the income can vary on a monthly basis and is not a function of an underlying interest rate. The Company has no material interest rate exposure.

Equity price risk

In certain circumstances, the Company may exchange the royalty investments for equity instruments in the investee company. The Company held significant equity security interests in seven investees, of which three are actively traded as the securities are listed on a recognized exchange. The fair value of the listed equity securities, similar to any other Level 1 asset, were measured using the quoted price of the shares by the numbers of shares held. The shares in Medical Imaging Corp. and Crimson Energy Ltd., the warrants in Boardwalktech Software Corp., DionyMed Holdings Inc., Stability Healthcare Inc., Spiridon Technologies Ltd. and Echobox Inc. are not actively traded and were classified as Level 3 assets. These Level 3 investments were measured using commonly used valuation models.

The equity price risk exposure at June 30, 2019 was $3,283,508 (December 31, 2018: $2,971,707) and a 1% change in the share price has an impact of $32,835 (December 31, 2018: $29,717) on the results.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Starting in 2014, the Company has foreign currency exposures to receivables in United States dollars. The Company continually monitors its transaction and translation exposure and its related impact on reported results. The foreign exchange exposure at June 30, 2019 was $12,754,617 (December 31, 2018: $14,389,742) United States dollars and a 1% movement in the exchange rate has an impact of $127,546 (December 31, 2018: $143,897) on the Company's results.

Credit risk

Credit risk is the risk that the counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company enters into royalty arrangements with investees in which a purchase price is advanced in return for participation in the investees' revenue stream. This can take the form of a royalty or promissory note, without limitation. The carrying amount of cash, accounts receivable and accrued income, and investments at fair value, excluding equity securities in investee companies, represents the maximum exposure to credit risk. The maximum exposure at June 30, 2019 was $40,064,348 (December 31, 2018: $30,880,616). The cash is held by a Canadian bank which is rated A+ and the cash is invested in short term liquid investments.

In monitoring credit risk, the Company considers industry, sales volume and aging trends, maturity, and other relevant factors. The Company performs ongoing credit evaluations of its customers' financial condition and limits the amount of credit extended when deemed necessary.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under normal and stressed conditions. The Company manages liquidity risk by reviewing its capital requirements on an ongoing basis and by continuously reviewing both actual and forecasted cash flows to ensure that the Company has appropriate capital capacity and liquidity.

The following table summarizes the amount of contractual future cash flow requirements including all financial instruments as at June 30, 2019 and December 31, 2018 respectively:

Contractual obligations	**< 1 year**	**1-2 years**	**3-5 years**	**Total**

Total	**$19,470,2494**	**$-**	**$ 5,127,590**	**$24,597,839**

As of June 30, 2019, the outstanding principal on the Series A convertible debentures ("Series A debentures") was $16,971,000 and the remaining term to maturity was six months. At the same date, the Company's liquid assets were approximately $25,100,000.

Capital management

The Company manages its capital with the primary objective of safeguarding it while providing sufficient working capital to sustain day-to-day operations. An important source of capital for the Company will continue to be from royalty payment income, realized gains on contract buyouts and fee income. On July 24, 2019, the Company announced that, subject to TSX Venture Exchange ("TSXV") approval, it had raised capital of $10,000,000 through its Flow Priority Return Fund LP ("LP") (**Note 22**). As repayments to the LP by the Company match payments received from the underlying royalty investments, the Company is able to manage the balance sheet obligations. This type of financing is expected to become an important source of capital for the Company as the more recent investments in the portfolio mature.

The Company will continually assess the adequacy of its capital structure and capacity and make adjustments within the context of the Company's strategy, economic conditions, and the risk characteristics of the business.

Transfer to assets held for sale (**Note 5**)	(11,708,384)	-
Ending Balance	**$ -**	**$ 12,115,869**

As at March 31, 2019, the Global Partner business was transferred to assets held for sale due to the disposal of the business **(Note 5**). On April 15, 2019, the sale of the business was closed and following the closing, there are no more intangible assets recognized.

Prior to the sale, the useful life of the acquired contracts was determined to be eight years with amortization determined on a straight-line basis over the expected useful life. The Company assesses at the end of each reporting period whether there is an indication that the asset may be impaired. If any such indication exists, the Company will determine the recoverable amount of the asset and if required, recognize an impairment allowance.

12. Income taxes

Incomes taxes recognized in statements of comprehensive Income (Loss) and effective tax rate	**22.82%**	**$ (336,365)**	**4.15%**	**$259,070**

Due to its nature, the bargain purchase gain of $304,908 and $5,459,147 that was recognized for the periods are not taxable and therefore the tax impact of $80,801 and $1,446,674 was reflected in the tax cost benefit of non-deductible expenses and non-taxable income.

(c) Movement in deferred tax balances

The Company has established, based on the financial performance, that it is probable that the Company will have future taxable income. As a result, the Company recognized a deferred tax asset for temporary differences existing at June 30, 2019. The composition of the deferred tax asset at June 30, 2019 and December 31, 2018 was as follows:

Amounts recognized in statement of comprehensive income (loss)	**June 30, 2019**	**December 31, 2018**

	581,559	**581,559**
Balance at June 30, 2019 and December 31, 2018	**$ 9,773,212**	**$ 9,365,187**

The effective tax rate used in determining the value of the deferred tax asset was 26.50%. The unrecognized deferred tax asset at June 30, 2019 was $1,723,678 (December 31, 2018; $1,498,428). The deferred tax asset was not recognized as it was not probable that the tax entity where the deductible temporary differences were located in will have future taxable income.

(d) Tax losses carried forward

The amalgamation of LOGiQ and Grenville on June 7, 2018 resulted in an acquisition of control under the provisions of the Income Tax Act ("Act"). Under the provisions of the Act, all unrealized losses on the date of the acquisition of control became realized. As of June 7, 2018, there was $29,075,818 non-capital losses created bringing the total accumulated non-capital losses available for use to $33,522,798 with an expiry in 2037-2038. Based on a long-term financial plan prepared by management and considering the reversal of existing deductible and taxable temporary differences, the Company expects that all the available tax losses will be utilized before the expiry date. As a result, a deferred tax asset of $8,186,616 (December 31, 2018; $8,309,955) was recognized on tax losses carried forward.

13. Provisions

Onerous contracts

The onerous contracts provision related to contractual obligations for operating leases for office space in Calgary and Toronto that did not provide future economic benefits to the Company. On Initial Application of IFRS 16, the onerous contracts provision was reclassified as an impairment allowance against the right-of-use asset for the underlying subleases recognized as finance leases under IFRS 16.

Retail funds indemnity

The Company assumed an indemnity to the buyer related to certain representations and warranties as part of the transaction prior to the reverse take-over on June 7, 2018. The indemnity assumed was recognized at the fair value of the liability assumed. There have been no claims made under the indemnity.

14. Convertible debentures

	June 30, 2019	December 31, 2018
Convertible debenture - Series A	$ 16,724,598	$ 16,667,633

Current	16,724,598	16,667,633
Non-current	3,965,526	3,742,526

On July 10, 2014 and July 17, 2014, the Company closed an offering for convertible unsecured subordinated debentures (the "**Series A Debentures**"), for aggregate gross proceeds of $17,250,000. The issue costs were $1,343,425, resulting in net proceeds of $15,906,575. The Series A Debentures bear interest from the date of issue at 8% per annum, payable semi-annually in arrears on June 30 and December 31 in each year commencing December 31, 2014. The Series A Debentures have a maturity date of December 31, 2019 (the "Maturity Date"). On the maturity date, the Company can satisfy its repayment obligations, either in whole or in part, in cash or with freely tradeable shares of the Company. The Series A Debentures are convertible at the holder's option at any time prior to the close of business on the earlier of the Maturity Date and the business day immediately preceding the date specified by the Company for redemption of the Series A Debentures into common shares at a conversion price of $1.7664 per common share, being a conversion rate of 566.12 common shares for each $1,000 principal amount of Series A Debentures. The Series A Debentures are listed for trading on the TSX Venture Exchange under the symbol FW.DB.A.

In Canadian dollars, for the six months ended June 30, 2019

For accounting purposes, the Series A Debentures are separated into their liability and equity components using the effective interest rate method. The fair value of the liability component at the time of issue was determined based on an estimated rate of 8.96% for the Debentures without the conversion feature. The fair value of the equity component was determined as the difference between the face value of the Series A Debentures and the fair value of the liability component.

The Debentures are direct, unsecured obligations of the Company, subordinated to other indebtedness of the Company for borrowed money and ranking equally with all other unsecured subordinated indebtedness. On or after December 31, 2017, but prior to the Maturity Date, the Company may, at its option, redeem the Debentures, in whole or in part, at a price equal to the principal amount of the Debentures plus all accrued and unpaid interest up to but excluding the date of redemption.

The following table summarizes the outstanding balance and changes in the amounts recognized in the liability and equity during the period:

Risk free interest rate	1.80%
Expected dividend yield	0.0%
Weighted average fair value per warrant granted	$0.0967

Stock Options

Under the Plan of Arrangement, the Company adopted the 10% "rolling" stock option plain maintained by Grenville. This stock option plan ("the "Plan") is to develop the interest of and provide an incentive to eligible employees, directors and consultants of the corporation and its affiliates. The Plan provides for the issuance of a maximum of 10% of the issued and outstanding common shares. Options granted may vest over certain time periods within the option period, which will limit the number of options that may be exercised. Each stock option is exercisable into one common share of the Company at the price specified in the terms of the option. As part of the reverse acquisition the Company maintained all outstanding stock options and no modifications were made to the terms that would be considered as beneficial to either the Company or the holder.

Between June 6, 2018 and December 31, 2018, 5,400,000 options were granted at an exercise price of $0.18. For the same period, 2,424,861 options expired or were cancelled and were forfeited.

Share-based payments

The Company uses the Black-Scholes option pricing model to calculate the fair value of any options granted. The model requires management to make estimates, which are subjective and may not be representative of actual results. Changes in assumptions can materially affect estimates of fair values. The following weighted average assumptions were used to estimate the weighted average grant date fair value: The following weighted average assumptions were used to estimate the weighted average grant date fair value of the outstanding options as at June 30, 2019;

Assumption	
Expected stock price volatility	104.34%
Expected life	5
Risk free interest rate	1.82%
Expected dividend yield	0.33%

20. Operating segment information

Flow operates as an investment firm providing revenue-linked capital and advisory services to emerging growth businesses.

As the Global Partner business was classified as an asset held for sale as at March 31, 2019 and a discontinued operation for the three and six months ended June 30, 2019, the Company activities are now managed and monitored by senior management as one operating and reportable segment. All of the Company's reported revenue is from external customers. The breakdown of the recognized revenue by country was:

	Three months ended June 30, 2019	Three months ended June 30, 2018	Six months ended June 30, 2019	Six months ended June 30, 2018
Canada	$ 726,575	$ (1,014,518)	$ 1,448,852	$ (88,951)

22. Events after the reporting period

Promissory Note with Wirkn Inc. ("Wirkn")

On July 4, 2019, Flow closed a new investment for $800,000 with Wirkn. In addition to a secured senior promissory note under the investment, Flow received warrants to purchase 284,742 Class A-2 Preferred Shares of Wirkn at an exercise price of $0.5619 for a period of ten years.

Royalty agreement with Spiridon Technologies Ltd. ("Spiridon")

On July 17, 2019, Flow closed an additional investment for $250,000 United States dollars with Spiridon. In addition to receiving a royalty under the investment, Flow received further warrants to purchase an additional 3,000,000 Class A Common Shares of Spiridon at an exercise price of $0.001 Canadian dollars for a period of five years.

Flow Priority Return Fund LP

On July 24, 2019, the Company announced that, subject to TSX Venture Exchange ("TSXV") approval, it had raised $10,000,000 through Flow Priority Return Fund LP ("**LP**" or "**Fund**"). In exchange for the $10,000,000 in the LP (the "Investment Amount"), Flow will grant to the LP, a royalty on a group of investments held by the Company and its subsidiaries (the "Underlying Royalty Contracts"). The royalty will pay the LP investors:

(a) An amount equal to the lesser of 1% per month of the outstanding Investment Amount or the royalty payments received by the Company from the Underlying Royalty Contracts; and

(b) All cash buyout payments received by the Company from the Underlying Royalty Contracts until 110% of the invested principal has been repaid

There will be no additional obligation or liability to the Company beyond the Underlying Royalty Contracts. Flow Investor Services Corp. (formerly LOGiQ Asset Management Ltd.), a subsidiary of the Company, was appointed as the General Partner.

Universal mCloud Corp. ("mCloud")

The $2,000,000 United States dollars senior note between the Company and mCloud was repaid on July 26, 2019 and as part of the discharge of the note, the Company received in addition to cash of $2,000,000 United States dollars, 1.5 million mCloud shares at a market value of $592,500.

Royalty agreement with DirecTech Labs Inc. ("DirecTech")

On July 31, 2019, Flow closed a new investment for $250,000 United States dollars with DirecTech. In addition to receiving a royalty under the investment, Flow received warrants to purchase 354,661 common shares of DirecTech at an exercise price of $0.7049 United States dollars for a period of nine years.

23. Contingencies

As described in Note 6, the Company acquired identifiable assets and assumed liabilities on the reverse acquisition of LOGiQ. The Company assumed some contingent liabilities of LOGiQ that have been outstanding for a number of years. Due to the low possibility of a payment or a loss, the Company assessed the fair value as nil as of June 7, 2018. A background to the contingent liabilities is described below.

LOGiQ Capital 2016, as a co-defendant has had litigation commenced against it by Performance Diversified Fund seeking damages of $5,000,000 from Front Street Investment Management Inc. and LOGiQ Capital 2016 (collectively, "the co-defendants"). In the claim, Performance Diversified Fund alleges that the co-defendants, in co-managing the assets of Flatiron LP with Sprott Inc. and Sprott Asset Management LP, breached their duty of care and fiduciary duty to Performance Diversified Fund. The Partnership along with the other co-defendants has commenced a third-party claim with respect to certain service providers to Performance Diversified Fund. The Company will continue to defend against the claim. The amount of the losses, if any, cannot be reasonably determined at this time.

In Canadian dollars, for the six months ended June 30, 2019

Under a share purchase agreement dated March 11, 2016 (the "SPA") with Brant Securities Limited ("Brant"), the wholly owned subsidiary, Aston Hill Securities Inc. ("AHS"), was sold to Brant. Under the SPA, the Company agreed to indemnify Brant in respect of certain claims, limited to a maximum amount of $300,000. A notice of claim has been received in respect of this indemnity arising from a third-party claim against Brant by a former AHS client. The Company based upon the terms in other agreements with Brant believe that it is unlikely that the Company will have to make a $300,000 payment.

In January 2019, the Company was served with a statement of claim on behalf of a former employee of Front Street Capital 2004. The claim is for damages and wrongful dismissal and relates back to the period prior to December 2016. On January 31, 2019, the Company filed a Notice of Intent to Defend. This claim is over two years and as a result the amount of the liability, if any, cannot be reasonably determined at this time.

In June 2019, the Company was served with a statement of claim on behalf of an employee who was employed by the Global Partners business and who decided not to take up the employment offer by the buyer when the business was sold in April 2019. The claim is for damages for wrongful dismissal and breach of employment contract. On June 19, 2019, the Company filed a Notice of Intent to Defend. As the employee himself terminated his employment with the Company and decided not to take up the buyer's employment offer, the amount of the liability, if any, cannot be reasonably determined at this time.
